

Quarry Lane investor overview

Seed financing presentation

PRODUCT

Equipment monitoring software

AUDIENCE

Prospective investors

STAGE

Synthetic seed company

DATE

September 17, 2026

Customer problem

Independent service teams track equipment condition across fragmented spreadsheets. Missing maintenance history causes unnecessary site visits and delays repairs.

Product and business model

Our subscription software combines equipment logs with a shared maintenance calendar. Illustrative annual contract price: \$12,000 per team. All customer and financial figures in this document are fictional.

Financing request

Seeking an illustrative \$2 million seed round to fund product development and a twelve-month customer pilot. The founding team combines field operations and software engineering experience.
