SUPPLEMENTARY INFORMATION:

I. Background

In accordance with section 51.118 of title 10 of the *Code of Federal Regulations*, “Final environmental impact statement—notice of availability,” the NRC is making available to the public, NUREG-1437, Supplement 15, Second Renewal, to the GEIS for License Renewal of Nuclear Plants, Final Report, regarding the subsequent renewal of Renewed Facility Operating License No. NPF-12 for an additional 20 years for V.C. Summer. A notice of availability of the draft SEIS was published in the *Federal Register*

on December 6, 2024 (89 FR 97077). The U.S. Environmental Protection Agency (EPA) issued its Notice of Availability on December 6, 2024 (89 FR 96960). The comment period was originally scheduled to close on January 21, 2025. On January 23, 2025, a notice was published in the *Federal Register* reopening the public comment period to accommodate a rescheduled public meeting and to provide additional time for members of the public to develop and submit comments (90 FR 8056). On January 31, 2025, the EPA issued a notice of extension of the comment period (90 FR 8715). The public comment period on the draft SEIS ended on February 11, 2025, and the comments received on the draft SEIS are addressed in the final SEIS.

II. Discussion

The draft SEIS was issued for public comment on December 6, 2024. The final SEIS addresses the comments received on the draft SEIS. As discussed in Chapter 4 of the final SEIS, the NRC staff has determined that the adverse environmental impacts of subsequent license renewal for V.C. Summer (i.e., the continued operation of V.C. Summer for a period of 20 years beyond the expiration date of the current renewed operating license) are not so great that preserving the option of subsequent license renewal for energy-planning decision-makers would be unreasonable. This recommendation is based on: (1) information provided in the environmental report, as supplemented, and other documents submitted by Dominion Energy South Carolina, Inc.; (2) consultation with Federal, State, Tribal, and local governmental agencies; (3) the NRC staff's independent environmental review; and (4) consideration of public comments received during the scoping process and on the draft SEIS.

Dated: May 13, 2025.

For the Nuclear Regulatory Commission.

John Moses,

Deputy Director,

Division of Rulemaking, Environmental, and Financial Support,

Office of Nuclear Material Safety, and Safeguards.

United States Cattle Inventory Report

WASHINGTON, July 25, 2025 – There were 94.2 million head of cattle and calves on U.S. farms as of July 1, 2025, according to the Cattle report published today by the U.S. Department of Agriculture's National Agricultural Statistics Service (NASS). This is the first July cattle inventory report since July 2023.

Cattle Inventory – United States: July 1

The July 2013, 2016, and 2024 Cattle reports were not conducted due to reduced funding.

Other key findings in the report were:

- Of the 94.2 million head inventory, all cows and heifers that have calved totaled 38.1 million.
- There are 28.7 million beef cows in the United States as of July 1, 2025.
- The number of milk cows in the United States is 9.45 million as of as of July 1, 2025.
- U.S. calf crop was estimated at 33.1 million head.
- All cattle on feed were at 13.0 million head.

To obtain an accurate measurement of the current state of the U.S. cattle industry, NASS surveyed over 17,900 operators across the nation during the first half of July. Surveyed producers were asked to report their cattle inventories as of July 1, 2025, and calf crop for the entire year of 2025 by internet, mail, or telephone.

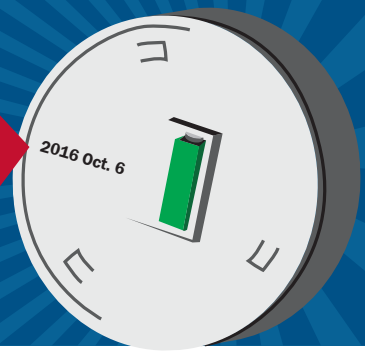

The Cattle report and all other NASS reports are available online at nass.usda.gov/Publications.

Replace Smoke Alarms Every 10 Years

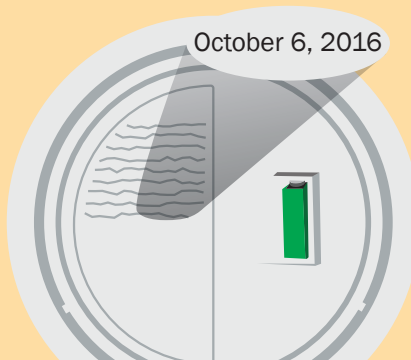

Age matters when it comes to your smoke alarms.
Check the manufacture dates on your smoke alarms today!

1

Remove the smoke alarm from the wall or ceiling.

October 6, 2016

2

Look at the back of the alarm for the date of manufacture.

3

Smoke alarms should be replaced 10 years from the date of manufacture.

4

Put the alarm back on the ceiling or wall if it is less than 10 years old.

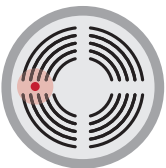

A closed door may slow the spread of smoke, heat and fire.

Test smoke alarms at least once a month by pushing the test button.

If the smoke alarm sounds, get outside and stay outside. Go to your outside meeting place.

Install smoke alarms in every bedroom, outside each separate sleeping area, and on every level of the home, including the basement. Larger homes may need more alarms. For the best protection, make sure all smoke alarms are interconnected. When one sounds, they all sound.

Call the fire department from a cellphone or a neighbor's phone. Stay outside until the fire department says it's safe to go back inside.
